

EDGE Server Implementation Weekly Update

Issue 10

1.13.2015

This weekly communication provides information on common questions we have received from issuers related to External Data Gathering Environment (EDGE) server implementation. Some of the information in this document will be incorporated into updated job aids.

Getting Help with Technical Difficulties and Business/Policy Questions

If you are having technical difficulties with registration, provisioning or file processing, please contact the CMS Help Desk at CMS-855-1515 or CMS_FEPS@cms.hhs.gov. Include in your email supporting documentation of the problem you are experiencing.

If you have business or policy questions related to the EDGE server requirements as outlined in the Interface Control Document (ICD), EDGE Server Business Rules and other published documentation, please submit your question to Registration for Technical Assistance Portal (REGTAP). If you have a specific business scenario you would like addressed, please include a sufficient amount of detail and/or examples to help us evaluate the question.

Please refrain from submitting questions/concerns to other mailboxes or directly to individuals unless specifically instructed. Submitting questions to other sources will likely result in a delayed response and resolution.

EDGE Server Hot Topics

EDGE Server Common Schema Tables and Expected Rows

This information was previously published in the EDGE Server Implementation Weekly Update on 12/19/2014. However, as part of the code release on 1/13, an update has been made to the expected row counts.

Below is a table that lists all the tables in the Common Schema and the number of rows expected in a successful implementation for the Common Reference Tables on your EDGE server. Please note, for issuer-specific plan references tables, the count of expected rows will vary.

Reinsurance Calculations

EDGE Server First RI Calculation – 1/12/2015

CMS will be releasing the remote command to run the first reinsurance calculation on issuers' EDGE servers around 4:00p.m. Eastern Standard Time (EST) today.

In order to ensure that this estimate run occurs on each issuer's EDGE server, issuers should upgrade their server to the latest EDGE Version. Next, issuers should execute the EDGE version command `"/opt/edge/bin/edge version"` to initiate the execution of the calculation job. If an issuer has configured the cron job on their EDGE server ("On-Premise EDGE Server Provisioning" Section 4.5), the remote command for the calculation will be executed automatically.

EDGE Server Implementation

Weekly Update

Issue 10

1.13.2015

On January 6, 2015, CMS requested that all issuers submit a new enrollment file to their servers so that issuers' enrollment records could be run through an updated version of the EDGE server software. Issuers that have not yet submitted a new enrollment file may encounter errors in the calculation. Additionally, there is a known defect in the RI calculation that is incorrectly including some small group plan enrollees in the reinsurance calculation. Issuers should disregard any reinsurance payment amount in their detailed reinsurance reports for small group enrollees.

Issuers are expected to complete the RI calculation by January 16, 2015. If for some reason you are unable to complete this process, please follow-up with your Account Manager as quickly possible. The remote command for the next round of risk adjustment estimates are expected to release on January 16, 2015.

Issuers should contact the CMS Help Desk for support via email: CMS_FEPS@cms.hhs.gov or phone: (885) -CMS-1515. Additional resources on the data submission process can be found in the Registration for Technical Assistance Portal (REGTAP) Library <https://www.REGTAP.info/>.

EDGE Server Resources

[REGTAP](#) is your primary source for communications and documentation for the EDGE Server.
